

MINJU (Kimmy) KIM

Seattle, WA, USA | kimmy.minju.kim@gmail.com | +1-(206)-739-1752 | [LinkedIn](#) | [Personal Website](#)

SKILLS

- **Programming & Data Engineering:** Python, SQL, Google Sheets, Microsoft Excel, Relational Databases, ETL Workflows, Data Cleaning, Data Transformation, Data Validation
- **Cloud & Analytics Technologies:** Azure ML, Power BI, Dashboard Development, Data Visualization, Web Application
- **AI & Analytical Tools:** ChatGPT, Claude, Cursor, Prompt Engineering, Workflow Automation
- **Data & Operations Support:** Reporting Analysis, Process Optimization, Cross-functional Collaboration, Technical Problem Solving
- **Languages:** Korean (Native), English (Fluent), Mandarin Chinese (Conversational)

EDUCATION

University of Washington, Seattle, WA | Master of Library & Information Science Jun 2026

Daejin University, Korea | Bachelor of Library & Information Science and Bachelor of International Studies Aug 2022

PROFESSIONAL EXPERIENCE

Student Assistant | University of Washington | Seattle, WA Sep 2024 – Jun 2026

- Developed structured reporting and data tracking workflows supporting 200+ student organizations, improving request visibility and reducing turnaround time by 25%.
- Maintained, cleaned, and validated structured datasets using Excel and Google Sheets, supporting reporting accuracy, workflow consistency, and analytical decision-making.
- Built dashboard and reporting workflows using Excel, Power BI, and analytical tools to support operational planning and service optimization.
- Collaborated cross-functionally with students, staff, and IT teams to improve workflow efficiency, technical coordination, and documentation processes.

Undergraduate Intern | National Library for Children and Young Adults | Seoul, South Korea Apr 2021 – Sep 2021

- Organized structured datasets, metadata documentation, and classification workflows improving information accessibility and consistency.
- Supported taxonomy-based information organization and user-facing documentation processes across public engagement operations.
- Assisted with operational reporting, structured information management, and accessibility-focused documentation workflows.

PROJECTS

AI-supported Learning Analytics System | Capstone Project | Seattle, WA Jan 2026 – Jun 2026

- Built AI-assisted data workflows transforming conversational and interaction data into structured datasets, analytical reports, and actionable insights.
- Applied workflow automation, structured output validation, and data processing techniques to improve reporting consistency and analytical reliability.
- Performed exploratory data analysis, trend analysis, and data validation to identify patterns and improve AI-assisted reporting reliability.

Ad Click Prediction Using Cloud-Based ML | Coursework Project | Seattle, WA Mar 2025 – Jun 2025

- Developed cloud-based analytical workflows supporting ETL processing, structured data transformation, dashboard reporting, and performance analysis.
- Conducted analytical testing and performance analysis to identify trends, evaluate model results, and improve reporting reliability.

Online Shopping Retail Database Development | Coursework Project | Seattle, WA Jan 2025 – Mar 2025

- Designed normalized SQL databases, analytical queries, and structured reporting workflows supporting operational analysis, data validation, and reporting accuracy.

Analyzing Netflix's Recommendation System | Coursework Project | Seattle, WA Jan 2025 – Mar 2025

- Analyzed recommendation behaviors, user engagement patterns, and structured datasets to evaluate personalization effectiveness.

ADDITIONAL EXPERIENCE

Reader/Grader | University of Washington | Seattle, WA Jan 2026 – Mar 2026

- Evaluated SQL queries, database workflows, and structured outputs ensuring technical accuracy and data quality.

Secretary | Korean Graduate Student Association at University of Washington | Seattle, WA Sep 2024 – Sep 2025

- Organized survey datasets and communication workflows supporting operational planning and increasing event engagement by 30%.
